As printed

(54) Title: TRANSPARENT AND POLARIZING VIEWING ELEMENT HAVING A ZONE ASSOCIATED WITH AN
OBLIQUELY ORIENTED POLARIZING FILTER

(54) Titre : ELEMENT DE VISION TRANSPARENT ET POLARISANT AYANT UNE ZONE ASSOCIEE A UN FILTRE DE
POLARISATION ORIENTE DE FACON OBLIQUE

orientation and said horizontal direction of 90 degrees and of 0 degree.

(57) Abstract: The invention
concerns a transparent and
polarizing viewing element (2)
divided into several zones (2a,
2b). At least one of the zones
(2a) is associated with a light
polarizing filter. The light passing
through the optical surface is
affected differently for two of said
zones (2a, 2b) depending on the
polarizing direction of said light.
The polarizing filter is obliquely
oriented relative to a horizontal
direction (H) in the operational
position of the element (2; 5),
with an angle between the filter

(57) Abrégé : Un élément de vision transparent et polarisant (2) est divisé en plusieurs zones (2a, 2b). L'une au moins des zones (2a) est associée à un filtre de polarisation lumineuse. La lumière traversant la surface optique est affectée différemment pour deux desdites zones (2a, 2b) en fonction d'une direction de polarisation de ladite lumière. Le filtre de polarisation est orienté d'une façon oblique par rapport à une direction horizontale (H) dans la position d'usage de l'élément (2; 5), avec un angle entre l'orientation du filtre et ladite direction horizontale distinct de 90° degrés et de 0° degré.
